SUMMARY

Bachelor of Science in Information Technology graduate with hands-on experience in full-stack web development and AI workflow automation. Proficient in Laravel, PHP, JavaScript, MySQL, HTML, CSS, REST APIs, Git, Object-Oriented Programming (OOP), Docker, and n8n. Seeking an entry-level Software Developer or Web Developer role where I can contribute to building scalable software solutions while continuing to grow professionally.

EDUCATION & AWARDS

Bachelor of Science in Information Technology

2022 – 2026

University of Rizal System – Binangonan

- Academic Performance: 1.33 QPA
- Best Software Development Study, URSB Research Congress 2026

INTERNSHIP EXPERIENCE

IT Developer & Support Intern | MIS Outsourcing Org

January 2026 – April 2026

- Configured and assembled server-grade systems, including hardware installation, OS setup, and performance optimization.
- Deployed and managed virtual machines using Proxmox VE.
- Performed remote server administration and command-line operations using PuTTY.
- Developed a full-stack Daily Time Record (DTR) web application using Laravel and MySQL.
- Used GitHub for version control and collaboration.

PROJECTS

[Daily Time Record \(DTR\) System | Laravel • PHP • MySQL | 2026](#)

- Developed a full-stack Daily Time Record (DTR) system using Laravel and MySQL.
- Implemented role-based authentication for administrators and employees.
- Built attendance tracking with Time-In/Time-Out logging.
- Automated attendance status computation (On-Time, Late, Early Out, Overtime).
- Developed leave management, announcements, and calendar scheduling modules.
- Designed an admin dashboard for employee management, attendance monitoring, and audit logs.

[AI Resume Screening & Recruitment Automation | n8n • Groq LLM • Google Sheets • Docker | 2026](#)

- Designed and developed an end-to-end recruitment automation workflow using n8n to automate resume processing and candidate screening.
- Automated resume collection from email and extracted PDF data using LLM-based parsing (Groq API) to structure applicant information.
- Implemented AI-powered screening system to classify and filter IT applicants, reducing manual resume review workload.
- Integrated Google Sheets, Google Drive, IMAP/SMTP, and Docker to manage applicant data, store resumes, and automate recruitment notifications.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Java, C#

Frameworks: Laravel, Bootstrap, Tailwind CSS

Database: MySQL

Technologies: REST APIs, Docker, n8n, Workflow Automation, LLM Integration, Google Drive API, Google Sheets API, IMAP, SMTP, Git, Object-Oriented Programming (OOP)

Tools: GitHub, phpMyAdmin, Proxmox VE, PuTTY, Salesforce CRM, Figma, Arduino
